Package 'curatedAdipoArray'

November 14, 2024

Type Package

Title A Curated Microarrays Dataset of MDI-induced Differentiated
Adipocytes (3T3-L1) Under Genetic and Pharmacological
Perturbations

Version 1.18.0

Description A curated dataset of Microarrays samples. The samples are MDI-
induced pre-adipocytes (3T3-L1) at different time points/stage of
differentiation under different types of genetic (knockdown/overexpression)
and pharmacological (drug treatment) perturbations. The package documents
the data collection and processing. In addition to the documentation, the
package contains the scripts that was used to generated the data.

Description

A Curated Microarrays Dataset of MDI-induced Differentiated Adipocytes (3T3-L1) Under Genetic
and Pharmacological Perturbations

Details

A curated dataset of Microarrays samples. The samples are MDI-induced pre-adipocytes (3T3-L1)
at different time points/stage of differentiation under different types of genetic (knockdown/overexpression)
and pharmacological (drug treatment). The package document the data collection and processing.
In addition to the documentation, the package contains the scripts that was used to generate the data.
